

Analytical Chemist

Radikal Therapeutics, North Shore, MA

Radikal has new opportunities in its expanding drug research /development laboratories on the North Shore for motivated MSc graduates with 1-2 years experience in HPLC, GC/MS, and/or LC/MS. The successful candidate will work as part of a fast-paced team focused on the analysis of novel small molecule drugs, natural products, metabolites and related compounds. Full or Part-time will be considered.

Responsibilities

The successful candidate will participate in multiple projects involving various aspects of the early pre-clinical development of small molecules and natural products as therapeutics. These include:

- Development of analytical methods for small molecules
- Performance of stability studies and identification of impurities
- Delineation of degradation pathways
- Development of methodologies for quantitation of drug, actives and metabolites in biological samples.
- Delineation of metabolic pathways

Other Duties

- Communicating data and findings to colleagues, locally and at other sites.
- General maintenance of equipment

Qualifications

- MSc. or Ph.D. in relevant disciplines
- Or B.Sc. with proven pharmaceutical record in method development
- Hands on experience with HPLC, LC/MS and/or GC/MS
-

Salary

- Commensurate with experience and responsibilities
- Paid vacation & Holidays
- Health insurance
