

Mass Spectrometry Director – Biologics / Biosimilars

Illinois

Primary Responsibilities:

- Lead a team of PhD level scientists characterizing Bio-Therapeutic proteins
- Provide direction regarding the development, optimization and qualification of mass spectrometric and biophysical characterization methods
- Maintain knowledge of emerging protein characterization techniques; contribute to patents and publications
- Propose strategic investments within the group for building on existing technology / staff
- Management will include day to day personnel direction and team coaching/mentoring

Candidate Qualifications:

- PhD and industry experience (10 years+) supporting drug development within a Pharmaceutical or Biopharmaceutical company
- Experience in the analysis of monoclonal antibodies (mAb) and/or Biosimilars
- Hands on experience with high res LC-MS/MS including QToF &/or Orbitrap for Protein/Peptide mapping
- Documented success in the analysis of complex structural problems via Mass Spec as identified through high impact publications and presentations, demonstrating creative thinking as well as innovative technical approaches
- Strong leadership, communication, and organizational skills

Compensation:

- Excellent remuneration package with full healthcare and 401k. Relocation is available!
