

# **Bioinformatician / Bioinformatics Scientist**

**Maryland / Washington D.C.**

Outstanding opportunity for an experienced Bioinformatician or Scientist with excellent software skills to work at the cutting edge of medical research. You will be working with a talented team of experienced R&D scientists to identify protein biomarkers for Oncology research. This is a well-funded lab at the heart of cancer research!

## **Your responsibilities:**

- Ultimate responsibility for creating a robust data analysis pipeline for discovery proteomics
- Keeping abreast of emerging technology to automate analytical data processing
- Developing scientific databases (SQL, SQLite) and integrating multi-vendor software packages to create strong research tools for internal and external collaborators
- Work closely with the scientists in the lab (proteomics/genomics) to aid the research and development of oncology research

## **Your background:**

- Minimum of a MS in Bioinformatics or Biotechnology (or related) and 3+ years' experience in the development of software tools for scientific research and development
- Knowledge of a combination of (but not entirely) C#, C++, Java, Python, JSP, PHP, HTML5, CSS, JavaScript, jQuery, SQL Server
- Basic understanding of analytical chemistry techniques (Bioassays, LC-MS, LC-MS/MS, etc)
- Excellent collaborative skills and a strong understanding of scientific research obstacles and how to utilize software to overcome them!

## **Your reward:**

- Full time / permanent position with a base salary of \$90k+ with bonus
- Health/dental/vision Insurance
- 401K + Paid vacation
- Working with some of the most talented oncology researchers in the country to help the fight against cancer!
